

BEARDOW ADAMS™

> Unique In Hot Melt Adhesives

Looking good on paper —
and in practice.

Block busting bonding.

Our hot melt adhesives have bookbinding covered, presenting the bookbinding industry with a truly unique range that answers all needs. Only exceptionally high quality raw materials are used in their production during an advanced manufacturing process.

This process delivers adhesives with superior pull strengths in all spine glue and side glue applications, bonding even the most difficult paper stocks.

A creative range of products for a creative industry.

For superior bookbinding, hot melts must be tough, flexible and have high adhesion. Our range of hot melts was developed to answer these needs – and more. These adhesives use the highest quality raw materials giving excellent thermal stability that prevents degradation. Their attributes mean that they run cleanly and efficiently for a long period of time. They are stable, don't char or gel and ensure an even application across the spine. So the only surprises are in the story line.

- Improves the presentation of publications
- Excellent page pull strength – well above industry norms
- Highly versatile – binding books, magazines, directories and catalogues
- Excellent temperature resistance – ideal for transportation and storage in hot and cold climates
- Runs on all speeds of machines – from slow to 18,000 clamps per hour
- Low maintenance – clean running and low charring
- Lower temperature applications
- Low odour with no fumes

Applications include:

- Spine glues • Side glues • Rounding and backing
- Tip ins • End gluing • Casing in

Experience. Expertise. Effortless.

At Beardow Adams, we have a long-established heritage of manufacturing proven hot melt adhesives for books, magazines, catalogues and directory binding. Our adhesives offer reliable, higher quality bonding to a range of materials. Our relentless research into new hot melts and improved applications has achieved success in:

- Resistance to residual ink solvents
- Improved lay flat properties
- Fast in line trimming
- Higher page pulls with less adhesive
- Low stringing hot melts
- Thermally stable hot melts that reduce charring

Beardow Adams hot melts for bookbinding.
The all-round answer for any application:

Bound to last from the first page to the very last, we produce hot melts that provide outstanding spine gluing, side gluing, and rounding applications.

Drawing upon unrivalled industry expertise, Beardow Adams produces hot melt adhesives that are peelable and non-staining for tip-in applications.

We manufacture a well proven range of hot melt adhesives to give a strong, durable spine with excellent cover adhesion.
