 **Intercol**

Intercol is an independent privately owned company within the Barentz* group.

Since the company was founded in 1972, the company has developed into a leading European manufacturer of industrial adhesives for the international market.

Over the years Intercol has developed a wide range of adhesives. Our range of waterbased as well as hot melt formulations cover any type of specialised application. Intercol is known for its high quality, tailor made adhesives. This is established by recognition of market demand and developing innovating problem solving technical solutions.

Intercol's modern and well equipped laboratory combined with a team of experienced technical consultants, is able to offer you the best possible solution with regards to application, bond quality, logistics, running characteristics and environmental requirements.

* The Barentz group specialises in the marketing, distribution and sales of raw materials for food, pharmaceutical and chemical industries in more than 25 countries in Europe

Firm Relationship

As our customers evolve, we too are evolving with their demands. This requires a close relationship in which Intercol considers customers as unique partners during often very intensive co-operation.

Our philosophy; "your bonding is our care" is put into practise by:

- Training sessions and workshops based on practical knowledge and current developments within the adhesive industry.
- Audits focussed on reduction in glue consumption, clean running and obtaining an optimal, high efficiency result.

Research & Development laboratory

Intercol adhesives are being developed to cover the specific needs of individual customers.

This starts with an accurate intake of their wishes and application requirements by our specialised technicians. In our modern and well equipped laboratory which offers intensive product test facilities, experienced technologists will engineer a well balanced product.

The adhesive formulation is ready for trials in practise only after extensive quality evaluations.

Strong in bonding

Centre of Excellence

The performance of the manufacturing process, both in quality of products as well as process efficiency will be enhanced by a sound knowledge of adhesives.

We feel that sharing our knowledge and experience is important and therefore offer workshops and courses on a regular basis. Our programmes are supervised by experienced trainers and focus on the theory of adhesion and practical applications.

The people within Intercol's Centre of Excellence are constantly in contact with product specialist, raw material manufacturers and application machinery suppliers to share and exchange up to date information

Service

Flexibility and customer orientated are two very important characteristics of the Intercol organisation.

Service is our priority which is found in:

- Versatile shipment and packaging possibilities; 2,5 ltr. jerry cans up to 20 tons tanker trucks.
- Supply from stock within 24 hours.
- Private label packaging and toll manufacturing possibilities.
